B20

**Reduce your
emissions
today!**

Reduce your carbon emissions by up to 13% with B20

Introducing B20

What is B20?

B stands for biofuel and **20** is for the percentage of biofuel per litre. B20 is a common biofuel blend which consists of up to 20% biodiesel and 80% mineral¹ diesel.

B20 is increasingly popular with fuel retailers and fleets worldwide, representing a good balance of cost, emissions reduction, cold-weather performance, and materials compatibility.

B20 is a typical blend for normal use in conventional diesel engines.

The benefits of B20

- » **Sustainable** – delivering up to 13% less GHG emissions
- » **Reliable** – delivering the same performance as regular diesel
- » **Available** – it can be ordered now, for use in your vehicles tomorrow
- » **Affordable** – competitively priced with regular diesel²

¹mineral diesel - Petroleum derived fuel oil suitable for diesel engines.

²regular diesel (B7) - Sold at the forecourt blend of a mineral diesel and biofuel with the biofuel element making up no more than 7% of the product, thus the title 'B7' which is displayed on the pumps.

B20

Give your business the B20 advantage

Availability

B20 can be delivered to you the same way as your regular bunkered road fuel, and ordered with your usual Inver representative.

B20 is a safe, easy to handle liquid fuel that requires no additional training or safety compliance above regular diesel and is suitable for most modern diesel vehicles. We do recommend that you confirm this with your dealer or manufacturer in advance.

Sustainability

We obtain verifiable evidence on the origin and sustainability impact of every litre of biofuel we blend into our fuel, to demonstrate compliance with the EU Renewable Energy Directive.

As part of the Greenergy Group, we leverage Greenergy's expertise and experience in sustainability and traceability.

Maximise Carbon Savings

Across Greenergy, we aim to achieve at least 70% carbon savings from our biofuels, which is significantly above the level required under the EU Renewable Energy Directive.

**Biodiesel can help reduce
your emissions from
vehicles on the road today.**

B20 Pricing

Premium biofuel at competitive prices

Inver B20 - The most affordable pathway to lower carbon transport. Due to increased global demand for lower carbon fuels, biofuels trade at a premium to mineral fuels. However, Inver Energy source the highest quality biofuels in large volumes to get the best quality at the best price.

B20 is:

- » Priced relative to the same index as regular diesel
- » The mineral diesel proportion is lower, subject to a lower carbon tax
- » Little or no financial capital required for infrastructure
- » Little or no additional cost for your vehicles
- » Contact Inver Energy at salesireland@greenergy.com for a quote

Simple steps to start using B20

- » Confirm with your vehicle OEM or main dealer that your vehicle is suitable for B20
- » Contact Inver Energy at salesireland@greenergy.com to obtain pricing
- » Repurpose an existing tank or source a new tank for B20 in your facility in consultation with Inver
- » Place your order, either by email or phone
- » Receive your delivery
- » Refuel your vehicle and reduce your carbon emissions by up to 13%

All Inver fuels are laboratory tested and independently assured, supplied directly to your facility.

Lab Certified

Tested by a certified laboratory at the refinery of origin prior to loading the oil tanker.

Independently Surveyed

Checked by independent surveyors for quality assurance at the loading refinery and at Inver's import terminals.

Certified Quality

Provided with Certificates of Quality for each individual cargo showing that the fuels meet EU and Irish specifications.

Tested

Tested for quality assurance prior to receipt from the oil tanker at Inver's import terminals and samples from each individual cargo are retained.

Independent Quality Assured Testing

Tested by independent surveyors and laboratories to insure quality assurance.

Inver - Controlled Delivery

Inver fuels are supplied directly from our jointly owned terminal in Foynes, Limerick.

Quality Fuel Programme

Our Quality Assured Fuels programme gives our customers the assurance that fuels supplied by Inver meet national and European fuel standards and have complete traceability from the point of manufacture to our customers.

Inver - Our Story

Supplying fuels in Ireland since 1984

Inver has been supplying fuels in Ireland for nearly 40 years. Inver derives its name from the Gaelic word for "estuary" or "mouth of the river".

Our name reflects our roots, the inception of our business on the Shannon estuary and the location of our jointly owned state-of-the art terminal in Foynes.

Our story began in 1984 with the purchase of a small fuel distribution company in Foynes, Co. Limerick on the Shannon Estuary. Today we are a leading importer of fuel products supplying a wide range of customers from local forecourts to large industrial businesses.

In 2012, the Inver Retail brand was established and has become a national network continuously expanding with forecourts around Ireland.

We have grown from a local supplier of fuel oil to a national supplier of a full range of fuel products selling over 700 million litres annually.

In 2017, Inver Energy was acquired by Greenergy, Europe's largest manufacturer of waste-based biodiesel and a leading supplier of road fuels in the UK.

Inver's innovation and expertise in the fuels business allows us to develop new products and services that can meet future demands.

We are continuously adapting our fuel offering to help businesses meet their decarbonisation targets in Ireland. Inver is dedicated to making Ireland's future cleaner and reducing greenhouse gas emissions with biofuel products like B20 and HVO for commercial vehicles.

We take great pride in delivering the best fuel and energy solutions to our customers.

HVO and B20 available now.
